WasteWise Desa Mentari · CSPH Group 1

Open questions for the team

Please reply in the group with answers or sources

1 Real block names and layout

The app uses "Blok 1" to "Blok 10" and a drawn map for now. We need the real block names and a rough layout of Desa Mentari.

Waiting on teammates

2 Drop-off points and collection schedule

All 5 drop-off points and the schedule (general waste Mon/Wed/Fri, recyclables Tue, bulky 2nd and 4th Sat) are samples. We need the real ones, with a source: JMB, MBPJ or the waste contractor.

Waiting on teammates

3 Sorting guide check

Who checks the sorting guide (bin colours and what goes where) against SWCorp, KPKT or MBPJ? The plan says guidance is "checked against credible sources".

Open

4 Figma in the plan

The plan says "Figma-based prototype", but we built a web app. Do we update the plan's wording (suggested text is ready), or also import the screens into Figma?

Open

5 Unverified information (activity 3)

Remove unverified items before demo day, or reword the plan to "label unverified information as sample"? Explained below.

Open

6 Announcement dates

The sample Christmas notice is dated 18 Dec, the day after demo day (17 Dec). The gotong-royong (5 Dec) and e-waste drive (12 Dec) will already be past. Move the dates earlier?

Open

+ Bahasa Melayu check

The BM version of the app was drafted by Jing Liang. Can a fluent BM speaker read through it before demo day?

Open

What is "exclude unverified service information"?

It is in the project plan: **Week 3 → "List down all activities" → activity 3, "Verify information"**. It says we check the waste guidance and recycling details against credible sources and **leave out anything that couldn't be checked**.

The app shows unverified items (drop-off points, schedule, announcements) with a "Sample" tag instead of leaving them out. So we either remove what can't be verified before demo day, or change that sentence to "label unverified information as sample".
